OBJECTIVE

Final-year Computer Science student with hands-on experience in Machine Learning, Generative AI, and backend systems. Built production-level applications including RAG pipelines and AI-driven systems. Seeking software engineering or AI roles to design scalable intelligent solutions.

EDUCATION

B.E. (Hons.) – Computer Science Engineering (AI & ML) Chandigarh University	2022 – 2026 CGPA: 7.88 / 10
Senior Secondary (Class 12) Millia Convent School, Purnia	2019 – 2020 88%

SKILLS

Languages: Python, C++, JavaScript, SQL
Frontend: HTML, CSS, React
Backend: FastAPI, REST APIs
AI/ML: NumPy, Matplotlib, RAG, LLMs, Vector Databases
Tools: Git, GitHub, ChromaDB

PROJECTS

AI Resume Screener with RAG-Based Candidate Ranking	2026
- Built an AI-powered resume analysis system using FastAPI and React to rank candidates against job requirements - Implemented semantic matching using embeddings and cosine similarity for accurate candidate-job alignment - Designed weighted scoring engine with category-based evaluation across frontend, backend, database, and project experience - Developed explainable AI module with evidence mapping and contextual gap identification - Created multi-resume ranking pipeline with structured output including score, strengths, gaps, and rationale	
Corporate Autopsy Machine — AI Tool to Predict Startup Failure	2026
- Collected and stored 150+ real startup failure stories (Quibi, WeWork, Theranos etc.) into a local vector database (ChromaDB) so the AI can search through them - Used a free local embedding model (sentence-transformers) to convert text into numbers for similarity search — no paid API needed - When user inputs a startup idea, the system finds the most relevant past failures and sends them to an LLM to generate a structured failure report with score, reasons, and suggestions - Built the backend using FastAPI and connected it to the React frontend so results appear word-by-word in real time instead of waiting for the full response - Designed the full UI in React from scratch — includes an animated circular score meter, progress bars for failure reasons, and a list of similar failed companies	

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified Data Science Professional	Oracle Corporation
Deloitte Data Analytics Job Simulation	Deloitte (Forage Platform)
Python for Data Science	Coursera
